

**IRONWORKERS
RECIPIENTS OF THE
"IRONWORKERS-
IMPACT NORTH
AMERICAN
SAFETY HONORS
PROGRAM"
THROUGH JANUARY 1, 2014**

Iron Workers-IMPACT North American Safety Honors Program

The purpose of the "Ironworkers-IMPACT North American Safety Honors Program" is to formally recognize our ironworkers who achieve outstanding safety performance on a bi-annual basis. Many complex projects throughout the United States and Canada are completed by our members and contractors on time, on budget with outstanding safety performance. However, in many cases these projects remain unnoticed to project owners, regulatory agencies, insurance carriers and others in the construction industry. The IMPACT Co-Chairs General President Walter

Wise and William Brown and the trustees want to pursue initiatives that will help our contractors and members to increase safety performance, and provide national recognition for contractors and ironworkers who achieve outstanding safety performance. We are pleased that the following members were nominated for the Safety Honors program and received a \$250 gift certificate and a letter of recognition from General President Walter Wise and William Brown for achieving outstanding safety performance on projects throughout the United States and Canada.
